Company Return on Equity Ratio for 2010 and 2009: The return on equity (ROE) ratio measures a company's profitability by comparing net income to stockholders' equity. For 2010, the ROE is 0.1885, while for 2009 it is 0.1621. The company has met its sales criteria at the time of product shipment, allowing for a profit margin calculation. The steps to determine A's profit margin are as follows: First, calculate the profit margin for fiscal year ended September 28, 2013, which is [insert calculation]. Next, calculate the profit margin for fiscal year ended September 29, 2012, which is [insert calculation]. Following this, the company must calculate the revenue earned on September 28, 2013, which is $172,066. The total expenses incurred on September 28, 2013 are given as follows: [insert calculation]. Finally, the balance of income summary account before it is closed for the fiscal year ended September 28, 2013 can be calculated by subtracting total expenses from revenue, resulting in a net income of $37,037.
